Re: Up State Tower Site Plan Review Application
Site #BUF-562C West Seneca

Dear Mr. Gullo:

Attached please find Site Plan Review application materials for a proposed telecommunications facility at 570 Mineral Springs Road. Up State Tower is constructing the facility on behalf of Blue Wireless. The proposed location is on town-owned property, in an M-1 Manufacturing district, adjacent to the NYS Thruway. Per Chapter 120-40.16.1.B(1), towers are permitted with Site Plan approval on both town-owned property and in the M-1 district, provided they are not located closer than the tower height plus 150' to any adjacent residential district. The tower height proposed is 150', and the location is not within 300' of any adjacent residential district.

Blue Wireless operates a communications system, licensed throughout western NY and northeastern PA, that offers affordable high-speed wireless voice and data service at a flat monthly rate. In addition, Blue is an approved Lifeline phone provider, and as such can offer qualifying local residents discounted cellular telephones. Blue Wireless is in the process of building out their network as required by the FCC, as well as enhancing the data capacity of their network with the addition of LTE (long term evolution) technology. This site will fill a significant gap in coverage, as well as provide enhanced bandwidth and data access for Blue's subscribers.

Wireless communications are ubiquitous in our society, and have become an increasingly important aspect of emergency communications as well. Wireless carriers constantly strive to improve coverage and network quality for their clients and to achieve a reliable wireless network for all users, including emergency responders and government agencies. Communication facilities are not only needed in new commercial and/or residential developments, but they are also required when the demand for wireless service increases through population growth or greater use of data by new technology, such as smart phones and tablets.

Recently, the New York Attorney General's office issued a memorandum entitled 'Municipal Regulation of Cellular Telephone Towers and Antennas,' which states:

"... cellular phone transmission has been declared by the state's highest court to be a public utility, meaning that municipal zoning must allow it a reasonable opportunity to exist and to serve its market. In 1993, the New York Court of Appeals in *Cellular Telephone Co. v. Rosenberg* held that cellular telephone service is a public utility, and that cellular phone towers are "public utility facilities", which gives them greater protection against restrictive zoning rules than if they were deemed instead to be ordinary commercial uses of land. If a community classifies cell towers as an allowed use in a given zoning district, reasonable standards may be enacted, and reasonable conditions may be imposed by the reviewing board. But even if a variance is necessary, a zoning board of appeals must grant approval if the cellular phone company is able to show that there are no reasonable alternative locations available which would allow the company to provide the same level of service to the cell (geographic area) in question."

(See <http://www.dos.ny.gov/cnsl/lu01.html>)

In 1996, Congress passed the Telecommunications Act of 1996, "an unusually important legislative enactment," establishing national public policy in favor of encouraging "rapid deployment of new telecommunications technologies." The federal Telecommunications Act of 1996 builds upon the federal regulatory framework for commercial mobile services which Congress established in 1993, and which was designed to "foster the growth and development of mobile services that, by their nature, operate without regard to state lines as an integral part of the national telecommunications infrastructure." H.R. Rep. No. 103-111, 103d Cong., 1st Sess. 260 (1993).

In 1999, Congress expanded further upon this policy by enacting the Wireless Communications and Public Safety Act of 1999, Pub.L. 106-81 113 Stat. 1286 (the "911 Act"). The 911 Act empowered the FCC to develop regulations to make wireless 911 available to all Americans. The express purpose of the Act, as articulated by Congress, was to "encourage and facilitate the prompt deployment throughout the United States of seamless, ubiquitous, and reliable end-to-end infrastructure for communications, including wireless communications, to meet the nation's public safety and other communications needs."

Public Utilities are a permitted use in the M-1 district per Section 120-20(7)(h) of the Town of West Seneca Zoning Code. Other public utility uses are also permitted, specifically 120-21(5) major power transformer or switching facilities, and 120-21(6) Petroleum storage tanks.

As stated earlier, towers are permitted (with Site Plan approval) on town-owned land as well as in the M-1 district, per Chapter 120-40.16.1.B(1) of the Town of West Seneca Zoning Code, provided they are not located closer than the tower height plus 150' to any adjacent residential district. The tower height proposed is 150', and the location is not within 300' of any adjacent residential district.

I look forward to discussing this project with you at your earliest convenience, and can be reached at the telephone number and email address below.

Very truly yours,
